

化妆品质量控制和产品质量安全测试

挑战

许多国家针对化妆品制定了严格的法规，质量不合格的产品可能受到海关扣留、从市场上召回或下架等处罚。化妆品企业需要专业的产品质量和安全合作伙伴，为企业提供所有必要的质量控制测试服务，以及解答全球各地市场的法规和要求。

如今的消费者已经完全意识到产品安全的重要性，并且清楚地了解自己的权利。消费者对产品的负面反响或投诉，会极大影响品牌的形象和声誉。

Quality Control and Product Safety Testing for Cosmetics

An alternative option for your company may be to choose to conduct a Second-Party Audit, instead of one for Certification. A Second-Party audit conducted by Intertek will include all aspects of a Certification audit, however it will not mandate surveillance visits. Second party audits may be used to provide a gap analysis of your social accountability system.

The challenges

Cosmetics are stringently regulated in many countries. Poor quality products may be detained at customs, recalled and removed from the marketplace. Not only do you need a partner able to support all required quality control testing services, but also one that can advise you on legislative requirements of various markets.

Consumers understand the importance of product safety and are well aware of their own rights. Adverse reactions and complaints from consumers will create a strong negative impact to brand image.

Intertek provides a complete offering of quality control and product safety testing services, accompanied by an extensive knowledge centre on legislations and standards. Operating from multiple testing centres located close to manufacturing sites, our quality control testing services cover major markets including USA, Europe, Canada, Australia, China, Japan, South America, ASEAN and countries with certification (Arabia, Russia, Kenya, and more).
