

# 皮具、皮革制品和皮箱

## 挑战

欧盟出台的三大技术性壁垒：REACH 法规、EUP 指令、PFOS 禁令，将分别于2007年6月1日、2007年8月、2008年4月全面正式实施。中国皮革企业出口面临极大挑战。

在三项技术性贸易壁垒中，最先施行的是化学品注册、评估、许可和限制法规的提案（简称REACH法规）。“REACH”实施后，中国皮革外贸企业为了获取认可，导致这些产品的成本大幅上升，进而丧失价格优势。而另一方面，如果产品检测不合格，则可能因为未能达到“REACH”法规而造成贸易失败。意大利检测出进口的中国鞋皮革中镍、偶氮染料、镉和五氯苯酚等4种物质超标，“毒鞋事件”刺痛鞋用化学品企业。

另两项壁垒分别是：能耗产品环境化设计指令《用能产品生态设计框架指令》（简称EUP指令）；制成品中全氟辛烷酰基化合物的含量不能超过质量的0.005%（简称PFOS禁令）。PFOS作为纺织品和皮革制品防水、防油污处理剂的主要活性成分，被部分用于高档纺织品、皮革制品和地毯等表面处理。目前国际上已有替代产品，但国内尚未研发出能完全符合欧盟对PFOS控制标准的纺织用助剂。据了解，广泛用于纺织品等领域的PFOS已遭欧洲市场全面禁止，这将成为我国纺织品出口欧盟的又一道重要技术壁垒。

如何应对挑战？  
如何应对欧盟三大技术性壁垒？

## 我们的解决方案

### Intertek 将为您提供整套的解决方案：

Intertek 拥有大量先进的测试仪器。通过我们的测试，可以确保产品在开始批量生产前，以及在整个制造过程的各个阶段，都能得到完全充分的质量评估报告。这样，才能确保产品满足消费者对于皮革产品的质量要求，从而有效地减少已购商品的退换提升消费者的满意度并且获得忠实的产品消费群体。

#### 手袋及小型行李包

在对手袋及小型行李包的质量评估中，手柄及背包带的强力和牢固性很重要。

Intertek 通过使用最新型的测试仪器来实现所有的强力测试，如此有效评估被系牢物件（例如通过带扣系牢）或直接连在包身的手柄及背包带被拉断的风险性。另外，Intertek 还能实现所有的色牢度测试，水渍测试等等，能评估皮包（特别是手袋）上的染料转移到衣物和沾水后皮革产生水泡的可能性。

#### 腰带

Intertek 按照客户的要求对腰带的皮革成分（分析后需要给标签），带扣沾色色牢度（包括干、湿摩擦色牢度，耐水渍色牢度等等）和金属成分进行测试分析，能确保产品达到“适用性”。定期的测试能保持产品质量并减少消费者的投诉。

#### 小商品（钱包，皮夹等）

小皮具可以进行诸如金属楞片装饰物附着力、纽扣附着力、接缝强力、里料耐磨性、面料耐曲折性等测试。另外，Intertek 在特殊测试项目上能提供技术性建议和技术帮助。

#### 皮衣

相对高价值的皮衣要求特别注意其外观，因为这常常是顾客退货的原因。成衣或生产前的制衣材料和组件可进行诸如干洗色牢度、光照色牢度、粘合性能和摩擦色牢度等测试。诸如拉链、里料、夹层和纽扣类组件也应依据外观来评定，也可以考虑整件成衣的清洁评定。

#### 大型皮箱测试

显然，大型皮箱提手和把柄的强力测试、耐磨性、耐曲折性和接缝强力测试等都很重要。我们高容量的拉力实验仪器确保Intertek能测试所有大型箱包项目，这些项目包括我们使用时可能期望的所有产品功能及质量要求。

#### 皮具中的化学物质

铬以及某些偶氮染料，甲醛和五氯酚是一些可能存在于皮具中的有害物质，Intertek具有高效技术分析仪器，能检测出较低含量的这些有害物质，而低含量的该类有害物质能伤害消费者身体健康和污染环境，因此，厂商及产品零售商应注重皮具中的有害化学物质测试。

# 皮具、皮革制品和皮箱 相关服务

在检测服务方面，Intertek还可以为您提供以下相关服务：

- \* 鞋类产品测试
- \* 生态纺织品测试
- \* 安全鞋检测认证
- \* 足球护胫测试

## 为什么选择Intertek

Intertek是全球领先的质量和安全管理公司，可以为众多行业和产品提供相关服务。Intertek致力为客户的产品和体系提供增加价值，帮助客户赢得国际市场上的成功。

Intertek实验室和办事处网络遍布全球100多个国家，员工人数超过20,000人，凭借国际化的专业技术和资源，为客户提供优质的本地化服务。

# Leather, Leather Goods and Luggage Challenge

Leathergoods are becoming increasingly important to consumers as fashion and everyday items. In response to increasing demands for high quality, problem-free goods, the Intertek global laboratory network is requested to carry out more and more quality control testing on a wide range of items.

## Our Solution

### Intertek offers full set of testing services for leather, leather goods and luggage:

Our extensive range of test equipment ensures that clients can have products fully evaluated before bulk production commences and at all stages during manufacture, thus ensuring the right quality is supplied to the customer resulting in fewer returns and increasing customer satisfaction and customer loyalty.

#### Handbags and Small Luggage Items

The strength of straps and strap fastenings is an important consideration in the quality assessment of handbags and luggage. Intertek is able to carry out all strength tests, using state-of-the-art equipment, to assess the risk of strap failures whether at fastenings (e.g. buckles) or where the strap is attached to the body of the item.

In addition a full range of colour fastness tests, water spotting tests etc. can be performed, particularly on handbags to assess the risk of colour transfer to clothing and possible blistering of leather finishes when exposed to water droplets.

#### Belts

From an assessment of the components of a belt for labelling purposes, colour fastness (wet and dry rub fastness, water fastness, etc.) to tarnishing of buckles and metal components, Intertek can test to clients' requirements to ensure the products are "fit for purpose". Regular testing of items will ensure maintenance of product quality and reduce the risk of customer complaints.

#### Small Goods (Purses, Wallets, etc.)

Tests such as attachment strength of gilt corner pieces, clasp attachment, seam strength and abrasion resistance of linings, flex resistance of outers, etc., can all be carried out on small leathergoods items. Additionally, Intertek staff are able to give technical advice/assistance to clients on specific items.

#### Leather Clothing

The relative high value of leather garments means that particular attention should be paid to their performance as they are often the subject of customer returns. Tests such as dry cleaning fastness, light fastness, finish adhesion and Veslic rubbing can be carried out on finished garments or materials and components prior to manufacture. The components such as zips, linings, interlinings and buttons should also be assessed for performance. A cleansing assessment on the whole garment may also be a consideration.

#### Large Luggage Items

Strap/handle strength tests, abrasion resistance, flex resistance and seam strength tests are all important for luggage items for obvious reasons.

Our high capacity tensile testing equipment ensures that Intertek is able to test all luggage items beyond what may be expected of them in use.

#### Chemicals in Leather

Chromium (VI), certain azo colourants, formaldehyde and pentachlorophenol are harmful substances which may be found in leather. Intertek possesses high technology analytical equipment to determine low levels of these chemicals, which can cause health problems to consumers and/or pollute the environment.

## Related Services

Intertek also provides the following services relating to testing:

- \* Footwear testing
- \* Eco-textile
- \* Safety footwear testing & certification
- \* Shin guard testing

## Why Intertek

Intertek is a leading international provider of quality and safety services to a wide range of global and local industries. Partnership with Intertek brings increased value to customers' products and processes, ultimately supporting their success in the global market place.

Intertek has the experience, expertise, resources and global reach to support its customers through its extensive network of laboratories and offices and over 20,000 people in more than 100 countries around the world.
