

BRC Global Standard Food Issue 5

The Challenge

From the farm to the fork, the entire food marketplace has evolved into a diverse network of industries. The demands of the BRC Global Standard Food Issue 5 are high, and with good reason. Food poisoning and contamination incidents have caused the recall of products and even in some cases death of consumers.

If the requirements of the BRC Global Standard Food Issue 5 are not understood, implemented, and embraced by all parties involved, not only is the quality of the food produced at risk, but also the defense of "Due Diligence" is more difficult to achieve - thus the reputation and brand value can be affected.

The Solution

The BRC standard is an internationally recognized standard for food manufacturers aimed at assisting in product failure avoidance. By implementing the BRC standard, your company will establish a recognized system to assist in the avoidance of product failure and successfully meet a number of required elements for a "Due Diligence" defense.

By becoming BRC Global Standard Food Issue 5 certified, your company will be registered in a database used by many retailers worldwide in determining prominent corporations / clients to conduct future business with.

Intertek is accredited by the United Kingdom Accreditation Service (UKAS) to successfully certify your organization according to the requirements of the BRC Global Standard Food. Intertek is also recognized as an approved certification body by the BRC and by many retailers worldwide.

With our help and support your organization can become certified and publicly recognized for your concern and attention to Product Quality, Legality and Consumer Safety.
