

美妆衣料

挑战

创新始终是为企业发展壮大的一大法宝。美容品不再仅仅局限于面霜和乳液，现在，科技创新已经将化妆品的范围大大扩展，出现了美妆衣料之类的具有美容功效的新型纺织品。这种美妆衣料含有一种持久物质，在接触人体时可释放到不同的皮肤表面上，因而产生美容效用。对于此类新产品，目前尚无特定的法规，但美妆衣料必须符合化妆品指令76/768/EEC和相关纺织品法规的要求，以确保消费者使用的安全和功效。

Cosmetotextile

The Challenge

Innovation remains one of the growth areas for manufacturers. Cosmetics are no longer the realm of simple creams and lotions. The boundaries of cosmetic innovation are being expanded with the inception of cosmetotextiles. These new products can be defined as textile articles containing a durable substance intended to be released on the various surfaces of the human body it comes into contact with and asserting a cosmetic action.

For newly developed products, there is no specific regulation yet. However, cosmetotextiles must conform to the requirements of the Cosmetic Directive 76/768/EEC as well as the governing textile regulations to guarantee safety and efficacy to the consumer.

- * Titration of the potentially dangerous residues on the finished product, being able to be absorbed through the skin
- * Stability study * Support for the construction of the cosmetic file and the drafting of the packaging

Efficacy
